Keywords:

Connection, Growth, Learning, Relationships, Social Issues

Message from Goldenrain Tree Flower Essence:

Our primary mission is to increase knowledge and understanding. This takes place by linking with all other beings who come into contact. This web of connection allows us to ever expand in learning – for all learning ripples back to us on these connections. More prosaically, this propensity can be transferred to others through our essence. It can enhance your ability to make meaningful contacts and deeper connection with all facets of life. You see how this can be useful – it is a symptom of your time that people are becoming every more “connected” but still hunger for closeness and contact. Paradox, is it not? For this situation comes about through contacts that are not meaningful on deeper levels – the contact is utterly superficial. This gives the illusion of connection, but the heart and soul is missing. We can help show the way back to a heart connection. Once one becomes more meaningful in his contacts, he will feel more urged and courageous in creating more, new contacts.
