#### Keywords:

Connection, Embodiment, Grounding, Incarnation, Joy

### Message from Hope of Spring Magnolia Flower Essence:

There can be no healing until the spirit finds comfort and home in the body. The “partway through the doorway” experience is really more out of the body than in. A full commitment to the incarnational experience is essential to making the “machinery” of health work.

There can be multitudinous reasons for a conditional incarnation. Our essence will serve to illuminate the ways in which this is true. That is, we aid in focusing the attention, the intention of the highest spirit part of you, which so much wishes to incarnate and fulfill the destiny of the experience so much hoped for. You see, this is a hot ticket, the ability to be in form, having this experience. Souls absolutely jump at the opportunity to do it. It is difficult, not comfortable, but it is a transcendent experience for a soul to have. It is much like those on your plane who climb to the highest peaks, risking all and enduring great difficulty. They do it for the experience, the magic of being there. The discomfort and difficulty are part of the deal. As is this experience of being in body.

So, our essence aids greatly in helping a spirit find its way fully into this body experience. Whether it was never seated on birth, or was forced out through traumatic experience, it makes little difference. We can show the way, show the joy and beauty of this life experience. For all its challenges and pains, it is an endless blessing.

When the spirit has fully linked with the physical form, great healing can take place. Without this, small things fail to happen to maintain good health, these small things tend to snowball and become more and more disharmonious. Our essence can greatly affect the re-seating process, allowing the spirit to firmly grasp the connection to the body.
