Message from Purple Sage Flower Essence:

If a person is to take our essence, several effects may be noted. The primary effect is that one feels a deeper sense of privacy, no matter how much outside stimulus there may be. You will find you can connect to your greater self as easily in the remote wilderness as on a crowded airplane. The connection is always there, no matter your circumstances. It is your perception of it that differs. However, the degree of clarity of connection depends on the clarity of the individual connecting. The second area of influence relates to the difficulty noted above. For before a clear connection can be made to higher self, the groundwork of self knowledge must be laid. Our essence can aid in this process. The “throwing off” energy will aid in the release of outdated thoughts, beliefs and fixed or trained notions of how one should be, think, act and interact with the world. We invite you to partner with us and use our essence to release ideas you wish to remove from your patterning. Everything but what is true can be freely released.

The essence is used to facilitate communication between self and higher self, self and other, self and other beings. The point is – the clarity of the channel between two beings is the issue here. When one recipient of communication receives the message with layers of his own interpretation along with it, the message becomes highly distorted. Use of our essence can release and clear the distortions, on both sides of the message.
